Hyderabad, India

PROFESSIONAL SUMMARY

Computer Science and Engineering student with an 8.90 CGPA and hands-on experience building Java and Node.js applications, backend APIs, MySQL workflows, and AI/ML prototypes. Comfortable taking real-world problems from idea to working implementation, debugging quickly, and iterating on product logic. Use AI coding tools such as ChatGPT, Gemini, and GitHub Copilot to accelerate development and problem-solving. Interested in shipping reliable, user-facing products in high-ownership engineering environments.

TECHNICAL SKILLS

Programming: Java, Python, C, SQL, JavaScript
Backend & Web: Node.js, REST APIs, HTML, CSS
Databases: MySQL
AI & ML: Machine Learning, CNNs, Image Processing, Generative AI, LLMs, AI Agents
Developer Tools: ChatGPT, Gemini, GitHub Copilot, Git, GitHub
Core Concepts: Data Structures, Object-Oriented Programming, debugging, backend development

PROJECTS

SunSafe Seat | Node.js, JavaScript **Apr. 2025 - Jun. 2025**

- Built a user-focused application that helps bus passengers choose the less sun-exposed side of a b comfortable journey.
- Designed recommendation logic using source, destination, travel direction, and journey time to determine the sun-facing side.
- Implemented left-side or right-side seat recommendations and handled direction and time-based edge cases to keep outputs consistent.
- Tested and refined the recommendation flow to turn a simple travel problem into a practical product experience that is easy to explain and extend.

Eye Disease Detection | Python, Machine Learning, CNN **Jan. 2026 - May 2026**

- Built an AI-based retinal image classification prototype to support early identification of common eye-d from fundus images.
- Implemented image preprocessing including resizing, normalization, and contrast enhancement to prepare consistent inputs for the model.
- Developed a CNN training and prediction workflow in Python, with separate modules for preprocessing, model training, and inference.
- Tested model outputs on sample retinal images, reviewed prediction behavior, and documented limitations and future improvements for the prototype.

Road Reporting System | Java, Node.js, MySQL **Aug. 2025 - Dec. 2025**

- Built an end-to-end workflow for users to report, track, and manage road-related issues with ima
- Developed backend APIs for user registration, road-issue submission, status tracking, and retrieval of submitted reports.
- Integrated MySQL to store user data, issue details, images, locations, and report status in a structured backend workflow.
- Implemented location-aware reporting and tested the complete submission-to-tracking flow to improve issue identification and usability.

EDUCATION

MLR Institute of Technology, Hyderabad **2023 - 2027**
B.Tech. in Computer Science and Engineering **CGPA: 8.90**

SR Junior College, Karimnagar **2021 - 2023**
Higher Secondary (Class XII) **98.3%**

Akshara High School, Gopalraopet **2020 - 2021**
Secondary School Certificate (Class X) **CGPA: 10.00**

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Agentic AI Foundations Associate (2026) - exposure to generative AI, LLMs, and agentic AI concepts.
- NPTEL Elite (IIT Kharagpur) - Programming in Java.
- NPTEL Elite (IIT Kharagpur) - Cloud Computing.
